

## **Sewer Line Repairs and Traffic Pattern Diversion for East State Street and Norway Avenue Area**

**(Hamilton) – Necessary sewer line repair work has begun at the intersection of East State Street and Norway Avenue in Hamilton Township. This work will require traffic pattern diversions and some road closures during the next 2 weeks.**

The work includes the replacement of 290 feet of sewer line on Norway Avenue from the middle of East State Street to Balog Avenue. Norway Avenue will be closed during construction from Balog Avenue to East State Street, as well as changes in traffic pattern on East State Street. No parking of vehicles will be permitted in the construction area on Norway Avenue between Balog Avenue and East State Street.

Hamilton Township's Department of Water Pollution Control has notified residents in the area of the repairs and is working to ensure uninterrupted sewer service for nearby homes. In addition, the pumping equipment that will be used to allow service to continue uninterrupted contains muffling devices that will help minimize noise for nearby residents.

All Township residents are reminded that information about traffic diversions from this project or other road construction projects is available on the Township's website ([www.HamiltonNJ.com](http://www.HamiltonNJ.com)) through the "Traffic Alert Tina" section of the home page.

Hamilton Township's Department of Water Pollution Control thanks residents and motorists for their patience during this necessary repair work. Residents with questions can call the Department of Water Pollution Control at (609) 581-4140 during weekdays between the hours of 8:00 AM and 4:00 PM.
